

ZICHRON YOSEF NETBOOKS FOR KIDS

After a recent visit to a cancer unit at Hadassah Ein Keren hospital – we saw many great kids in different stages of their treatment –many of these kids are confined to the hospital for weeks on end. As you can imagine, these kids don't really have much to do – after all it is a hospital. Furthermore, their poor loved ones – who spend many hours by their side, are also in need of some release and ability to work or communicate with others.

Therefore we decided to establish Zichron Yosef, in memory of Joseph Bromberg Z"l. Zichron Yosef's goal is to provide kids on long term hospital care, with a netbook computer loaded with useful software and games as well as a wireless connection to the internet.

Our hope is that these computers will make the treatment a little less difficult for the kids and their families. The netbook computers will be loaned to the children for the duration of their treatments – allowing them to really have a tool that they can use and enjoy.

Zichron Yosef is a recognized charity in Israel and in the US. We are proud to be affiliated with Lema'an Achai Israel, an organization dedicated to helping the needy get back on their feet.

To make a donation: For All Donations please write Zichron Yosef on top of the check.
